# **Westfield Sportscars**

**Factory Built, Complete and Module Kits**

## Welcome

At Westfield we pride ourselves on providing the customer with a range of models and approaches to personalise your Westfield experience – so whether you’re looking for a sunny weekends driving, a track day experience or an out and out race car, buying a Westfield will help you gain the ultimate in driving pleasure. This brochure covers pricing and options for our factory built vehicles, and comprehensive self build packages which require no sourcing of other components.

## Self Build

Self build packages can be purchased either as a complete package, or by module, sequenced to support the vehicle build in stages (not available for AeroRace and Mega Range). Each module contains every component for that stage of the build and can be purchased separately to match your budget and build programme. All parts provided are new and the average customer build time is 120 hours requiring no special tools or equipment. Your build is supported by comprehensive instructions and our famous factory support.

We do recommend specifying all options for self build projects at the outset, as some options require specific modifications to the vehicle which cannot be implemented at a later stage.

## Models

	<b>AeroRace</b>	The ultimate for track and competition.
	<b>Sport</b>	Tailored for touring, at home on the track.
	<b>MegaBusa</b>	Road legal with motorbike engine, focused for track.
	<b>SEiGHT</b>	V8 engined for road or track.

All models come with double wishbone independent suspension and disc brakes all round as standard.
